

HARKEN[®]

I N D U S T R I A L

CONTRACT CUTTING AND SEWING

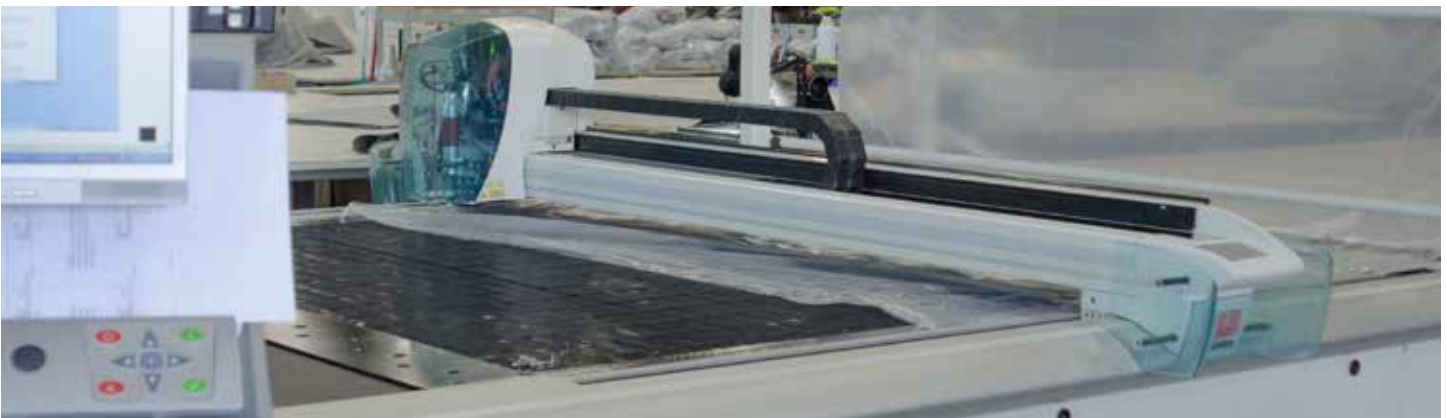

We specialize in cutting and sewing industrial fabrics, with production capacity ranging from one-off prototypes to consecutive large runs. We take a high-tech, high-touch approach to every product we make. We pay an obsessive attention to detail and can bring comprehensive design and engineering assistance to complex projects. Our capabilities include CAD-based cutting, electric hand cutting, grommet and fastener installation, product assembly, pattern digitizing, material sourcing, and shipping.

At Harken Canvas, we take a high-tech, high-touch approach to your product's build, from custom patterning and digitized cutting to hands-on assembly and inspection by our experienced canvas team. We are backed by the full resources of an international manufacturing company with operations in 48 countries.

LECTRA VX CUTTER

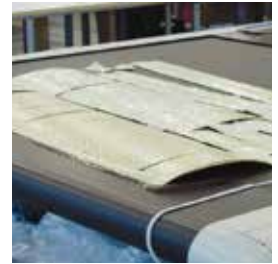

The Lectra VX is a conveyor-fed vacuum cutting table that combines the speed and accuracy of computerized cutting with continuous material feed. A vacuum controller controls the system pressure, ensuring optimum hold-down for cutting a wide range of different materials. PILOT software and sophisticated electronics monitor current, temperature, and voltage to ensure the cutter is operating to tight specifications and at peak performance.

Our cutting table can stack-cut materials of any length up to 1" thick and widths to 72", optimizing efficiency and time to market.

WE CAN CUT A WIDE RANGE OF INDUSTRIAL, COMPOSITE, AND TECHNICAL TEXTILES

Prepreg carbon fiber, Kevlar®, vinyl, polyesters, nylon, cotton, felt, fleece, neoprene, upholstery fabric, rubber, closed cell foam, cardboard, and more.

RECENT CUSTOM CUT AND SEW PROJECTS

- Gaskets
- Materials for sample books
- Upholstery pattern cutouts
- Trauma responder bags
- Industrial curtains
- Banners
- Covers of all types
- Padded bags
- Replacement awnings
- Outdoor shelters
- Pump covers
- Boot liners
- Shipping boxes
- Cushions
- Conveyor belt tarps
- Tool pouches
- Utility bucket covers
